DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14,15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14 and 15 states that electro optical device is mounted thereon, it is not clear mounted where or how, since claim 1 is an electronic circuit, it is not clear mounted how or where, correction required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2629

Claims 1,4-7,9-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Fuse et al., (U.S. Patent No. 5,089,812).

As per claims 1,7 Fuse shows an electronic circuit, comprising: a shift circuit that shifts j-bit digital data (j is a natural number) to be converted into k-bit digital data (k is a natural number); and a correction circuit that is electrically coupled to the shift circuit, the correction circuit continuously changes the k-bit digital data that is obtained by the shift circuit in accordance with the change of the j-bit digital data (in col.4 lines 37-60 where 5-bit signal which is changed to 6-bit signal).

As per claims 4-6,9-15 Fuse teaches the correction circuit being an adder (read as element 23 a limiter and in fig.8, 9) and the shift circuit determining a number of bits by which the j-bit digital data is shifted in accordance with the value of the j-bit digital data (in fig.4 and 6).

Allowable Subject Matter

3. Claims 2-3,8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nitin Patel whose telephone number is 571-272-7677. The examiner can normally be reached on 8:00-5:00.

Application/Control Number: 10/629,592 Page 4

Art Unit: 2629

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin H. Shalwala can be reached on 571-272-7681. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
